IMPORTANT NOTE: Please see our updated blog post on the 37 Best Websites to Learn Something New. This list of websites and apps provides a curated but comprehensive overview of some of the best sites out there for you to learn anything, from making hummus to building apps in node.js. As the name indicates, this website is a collection of books with step-by-step instructions. The book titles cover a wide range of topics:

Accessible and optimized for smart phones and tablets, these books and lessons also include videos and podcasts. Website: www.grantmorrison.com Website: www.khanacademy.org

Accessible and optimized for smart phones and tablets, these books and lessons also include videos and podcasts. Website: www.grantmorrison.com Website: www.khanacademy.org

  Accessible and optimized for smart phones and tablets, these books and lessons also include videos and podcasts. Website: www.grantmorrison.com These websites cover topics across the spectrum of digital media, from 3D animation to filmmaking to game development. As with our other suggested learning resources, the courses are accessible on the web or via mobile apps, where users can watch video tutorials, view lesson plans or practice coding in an interactive environment using pre-made game art assets (which are available for download). Website: www.creativelive.com/brands Website: aplus.com Accessible and optimized for smart phones and tablets, these books and lessons also include videos and podcasts. Website: www.grantmorrison.com Website: www.khanacademy.org \t\t\tWhile this is not technically a website, it is an app that provides lessons for you to study on your smartphone or tablet (iOS or Android) using "emergent content" (texts, questions, videos). It is similar to Khan Academy in terms of format, but with an emphasis on self-study. Website: www.mindbites.com/lessons/internet-of-things Website: www.screwdriversusa.com This website provides lessons for you to practice web development with lots of examples and projects to complete along the way. The content is available in videos, PDFs, or HTML tutorials. The website also features workbooks full of lessons, examples, and challenges for practicing your skills in real-world situations . Website: www.codecademy.com Website: www.codecademy.
