About This Game

You are the GUNNVR, controlling a United Dynamics prototype remote upgradable turret on an Earth Defence Force shuttle.

Intelligence has sent you to check out a large field of asteroids that has mysteriously appeared in Earth's orbit.

Can you break up the rocks in time to save the civilians?
Do you have the resolve to track down why this happened?
Will you get rich destroying hostile enemy ships?
Are you going to fly something better than a Defence Force shuttle?

If you have the courage, you will find the answers in this spaceship turret control game for the HTC Vive!

Note: All settings and progress you make in the free demo will be saved to your Steam Cloud and automatically loaded into purchased Early Access and final retail versions.

Title: GUNNVR
Genre: Action, Adventure, Indie, RPG, Simulation, Early Access
Developer:
Artificial Games Inc.
Publisher:
Artificial Games Inc.
Release Date: 28 Mar, 2017

b4d347fde0

Processor: Intel Core i5 4590 or AMD FX 8350 or greater

Memory: 1 GB RAM

Graphics: GeForce GTX 970 or AMD Radeon R9 290 or better

Storage: 2 GB available space

Sound Card: DirectX compatible sound card

Additional Notes: This game requires the HTC Vive

English

TOKENS

The screenshot displays a digital token library for a role-playing game. The main area is a grid of 50 circular tokens, each containing a different character or creature illustration. The tokens are organized into rows and columns. At the top of the grid, there is a search bar and a close button. Below the grid, there are several dice icons (purple, red, green, blue, yellow, black) and buttons for 'GM', 'Shared', 'Modules', and 'Store'. On the right side, there is a vertical sidebar with various category icons: 'CHARACTERS', 'NOTES', 'MAPS', 'STORY', 'NPCS', 'ENCOUNTERS', 'ITEMS', 'PARCELS', 'VEHICLES', 'SPELLS', and 'LIBRARY'. The bottom of the interface shows a horizontal axis with labels A-1 through A-12.
